

## SETTING UP A MEGA SERIES CANOPY

1

With 2 or 3 people - remove the canopy from the roller bag and roll the canopy in the center of the desired setup location.

2

Gently pull the outer frame legs until the frame is fully extended.

3

Lock each of the corner sliders into place by holding the top of the frame leg with one hand and pushing the slider upward until the lock clicks into place.

20'x20' top will not look like this until after step 4.

4

Manually extend the peak poles with the provided extendable pole.

5

Secure the valance velcro strap to the leg of the canopy.

6

Thread the tension strap through PVC truss cap and fasten to itself.

7

Adjust the frame legs to your desired height by raising the leg and slowly sliding the inner leg into place until the lock clicks. Repeat the same operation with the remaining legs. By placing a foot on a footpad and slowly extending each leg into position.

8

Lock the wheel if applicable by stepping on the brake lever. (Wheels are not necessary)

## TAKE DOWN YOUR MEGA SERIES CANOPY

1

Lower the canopy by disengaging the lower legs, bringing the canopy to setup height.

2

To take down - undo all velcro top straps and firmly press the red lever on upper legs
