

StarShade Setup

1.

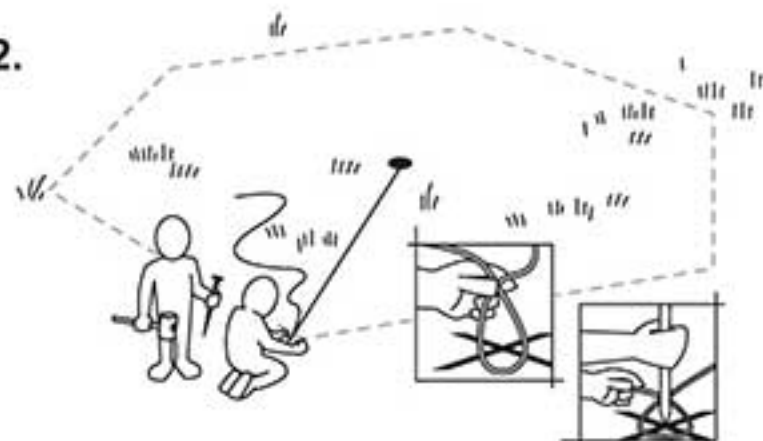

Caution: Check Starshade site for overhead power lines and underground sprinkling systems. Avoid use during heavy downpours and strong winds. Refer to your warranty for conditions which are exempt from coverage.

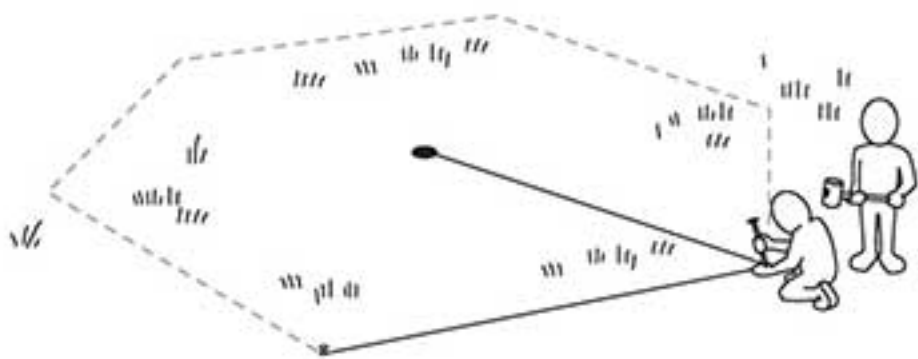

To establish the center of the area you wish to cover you can take the cable provided and stretch it out from end ring to end ring.

2.

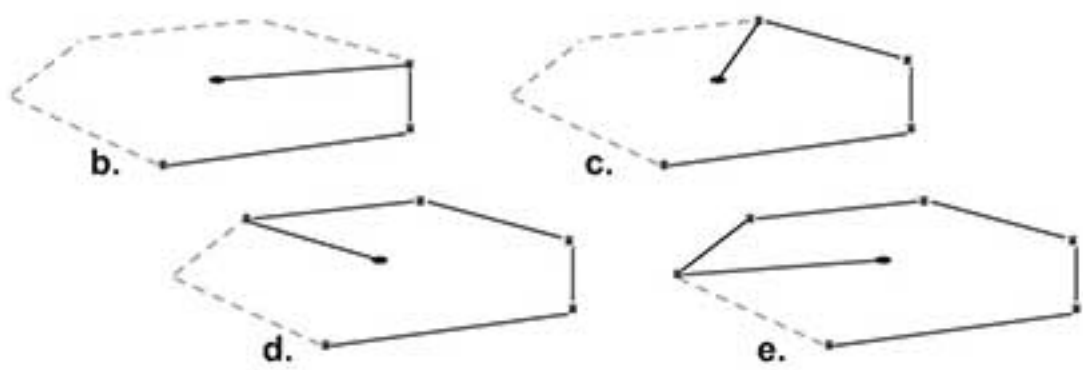

Take cable and put end ring on over center stake. Extend, holding the center ring out until cable is tight. This center ring will be where your first stake is located.

3 a.

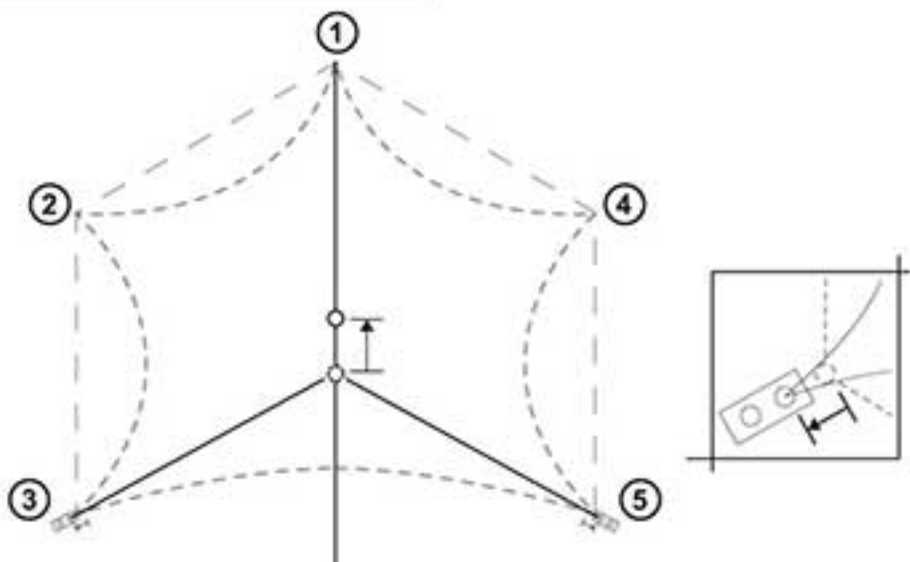

Leave the end ring on the center stake, take other end ring and drive in spike, now place over first stake. Again stretch out holding center ring until tight. This is where second stake now goes. You will now see a triangle.

3 b, c, d, e.

Leave end ring on center stake. Remove rings from stake 1 and 2. Take other end ring and place on stake 2, stretch out holding center ring. Continue to locate as shown by b, c, d, and e.

StarStage Setup

Locate the center area of the StarStage. The center stake and number one stake should point to the audience.

Now locate stake two, three, four and five with cable.

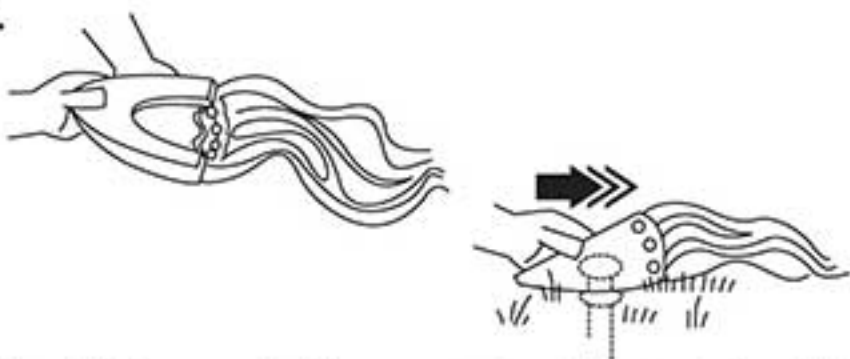

Move out, in line with the center, stake three and five one foot. Double stake three and five through anchor plate.

The center stake moves three feet towards number one.

Now drive all stakes into the ground.

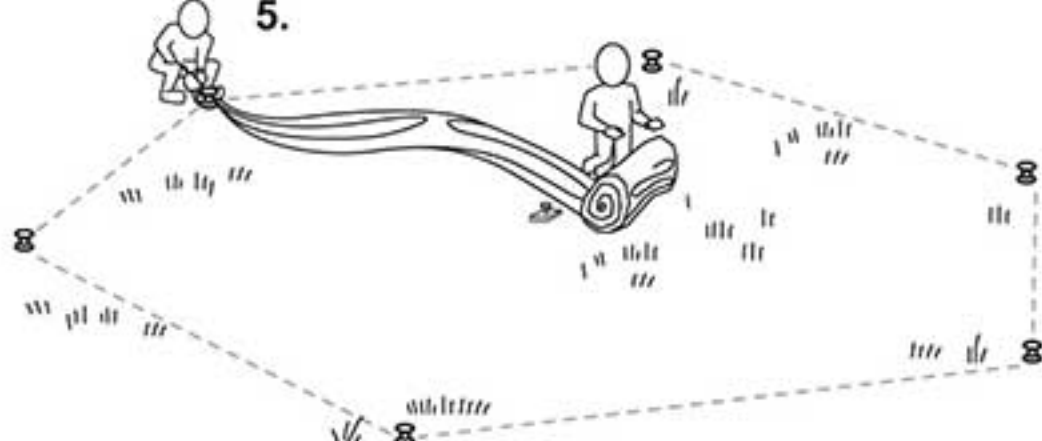

StarStage / StarShade Setup continued...

4.

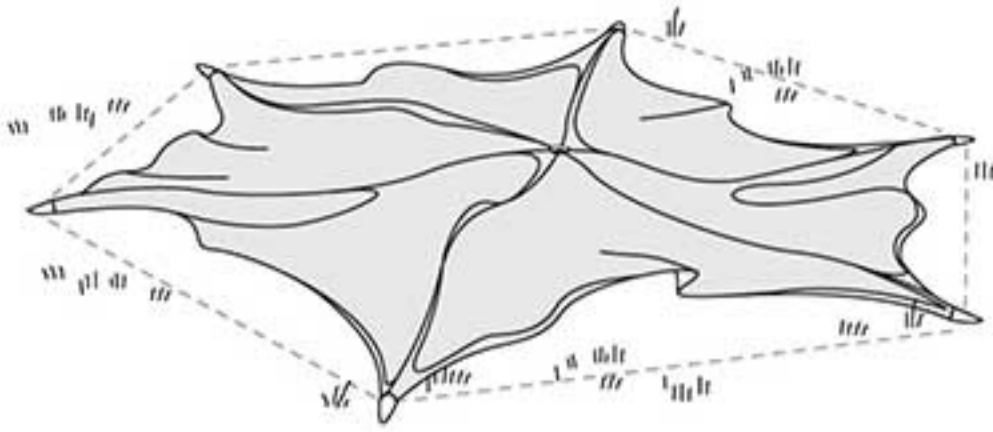

Take all shoes and slide over stakes. Your tent should be totally stretched out over the ground with each shoe attached to a stake.

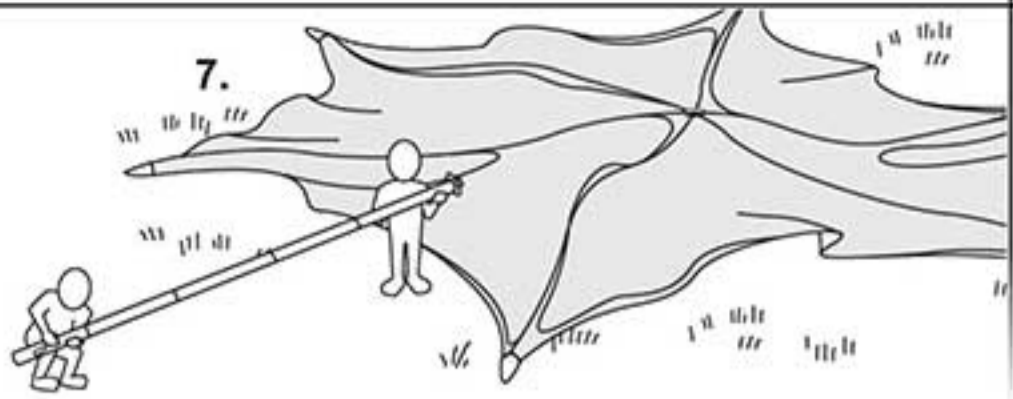

5.

6.

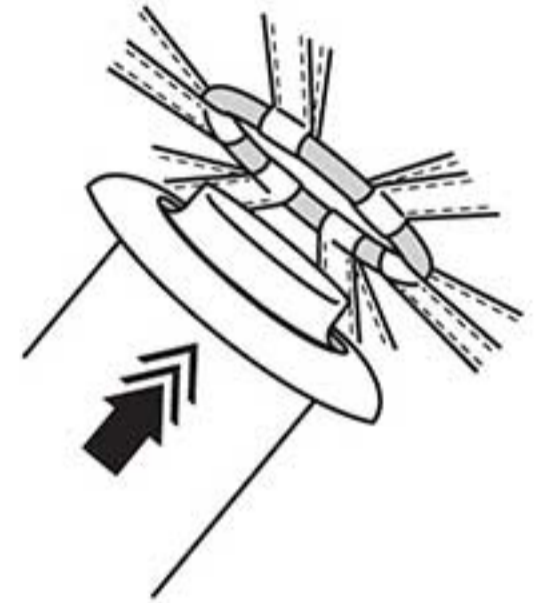

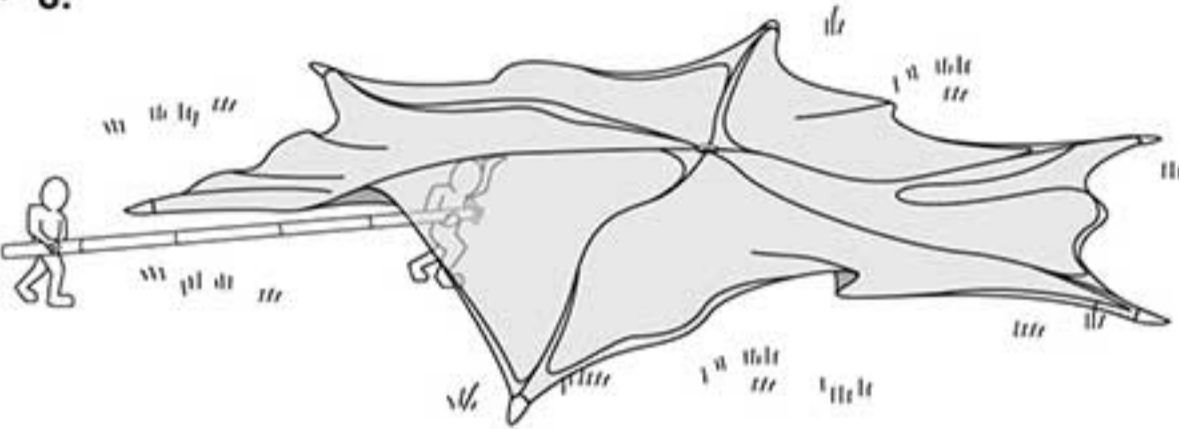

7.

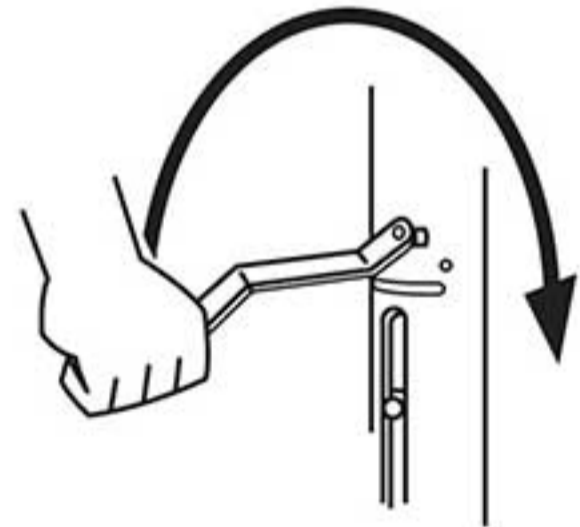

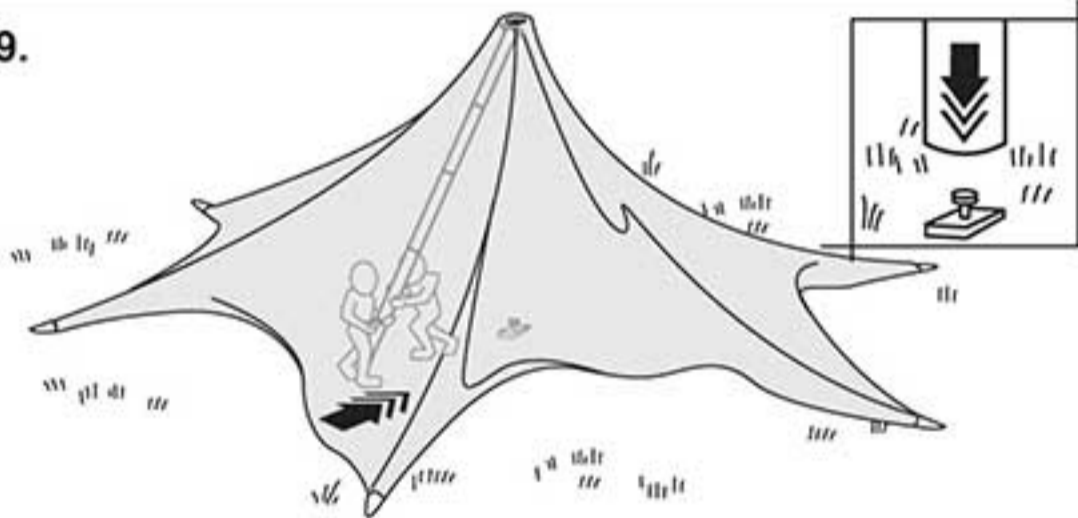

Take pole with dome, slide one pole into fitting, then another and so on. The pole should have the dome on top, all others in between and the last pole should be the one with the jack

8.

Insert assist bar in to hole in the jack pole. Take center pole that was assembled and with 2 people go under the canopy. Carrying the pole & dome ring with hand on assist bar, attach center dome to strapping under top in the center.

9.

After attached continue to put pole upright until it is resting on center stake. Remove assist bar. Take jack handle out of case, attach to jack shaft. Turn clockwise.

10.

Your unit is ready for use. Take down? Follow steps in reverse order.
